Dear Hiring Manager,

As a 2nd-year Software Engineering student at the University of Waterloo, I am excited about the opportunity to join Genesys for my winter 2024 internship. I had the pleasure of connecting with your team members, Monti, Johnson, and Karanjot at the co-op informational session and Hack the North, and their enthusiasm further solidified my desire to be a part of Genesys.

Please know that I will bring an intense work ethic and a willingness to do what needs to be done. Engineering is not an easy program, though I've thrived to date via a passion for the subject and a desire to work collaboratively. Last year, I secured a 3.9 GPA while participating in the Software Engineering Society, the Mathematics Society, while working as Firmware developer for the Formula Electric design team.

I took my experiences and learnings from First Year with me to my co-op term this summer, discovering that the determination and team-first mindset that delivered results in the classroom proved even more pivotal in the workplace. By focusing on how I could improve, and working closely with my colleagues, I was able to make a real contribution, and hopefully, develop connections that will sustain in the years ahead.

The insights from Monti, Johnson, and Karanjot about Genesys' dynamic culture and its impact on the software industry resonated with me deeply. I share their enthusiasm for the company's vision and innovative approach.

I'd welcome the chance to speak further with you.
