Dear Hiring Manager,

I'm a 2nd year Software Engineering student at the University of Waterloo, looking to contribute to your organization as part of my winter 2024 internship.

Please know that I will bring an intense work ethic and a willingness to do what needs to be done. Engineering is not an easy program, though I've thrived to date via a passion for the subject and a desire to work collaboratively. Last year, I secured a 3.9 GPA while participating in the Software Engineering Society, the Mathematics Society, while working as Firmware developer for the Formula Electric design team.

I took my experiences and learnings from First Year with me to my co-op term this summer, discovering that the determination and team-first mindset that delivered results in the classroom proved even more pivotal in the workplace. By focusing on how I could improve, and working closely with my colleagues, I was able to make a real contribution, and hopefully, develop connections that will sustain in the years ahead.

I'd welcome the chance to speak further with you.

Kieran Hulsman
