---

Dear Hiring Manager,

I'm a 2nd year Software Engineering student at the University of Waterloo, looking to contribute to Ford as part of my winter 2024 internship.

Please know that I will bring an intense work ethic and a willingness to do what needs to be done. Engineering is not an easy program, though I've thrived to date via a passion for the subject and a desire to work collaboratively. Last year, I secured a 3.9 GPA while participating in the Software Engineering Society, the Mathematics Society, while working as Firmware developer for the Formula Electric design team.

I took my experiences and learnings from First Year with me to my co-op term this summer, discovering that the determination and team-first mindset that delivered results in the classroom proved even more pivotal in the workplace. By focusing on how I could improve, and working closely with my colleagues, I was able to make a real contribution, and hopefully, develop connections that will sustain in the years ahead.

All of the previous Ford co-op students I know have spoken highly of their experience at the company, and I'd love to spend the winter term learning alongside some of the best developers in Canada.

I'd welcome the chance to speak further with you.

Kieran Hulsman
